DESCRIPTION:

This class is a great opportunity to play with a variety of fabrics and shapes. Funky, wild, silly, crazy and wacky are a few of the words that come to mind when thinking about “building” your house blocks. In this workshop you will use needle-turn hand appliqué technique to create your own funky house. There will be patterns available but know that you will be encouraged to create your own houses if you are so inclined.

The focus will be the use of unusual colors, shapes and textures while working in a fairly quick and spontaneous manner with an emphasis on NOT over thinking every decision. It is a liberating and fun way to work. There are not a lot of rules in this workshop. If you have time, try to sketch out a few ideas of your own ahead of time. Keep the shapes and details simple, especially if you have had little or no experience with hand appliqué.
